

The Collaborative Research Platform for Data Curation and Repositories: CKAN For ANGIS Data Portal

Hsiung-Ming Liao, GIS Center, Academia Sinica

Outline

- Open Access & Open Data
- CKAN introduction
- ANGIS data portal
- New developed features
- Future works

Open Access & Open Data

- **Open Access** means unrestricted online access to peer-reviewed scholarly research.
- **Open Data** means research data that can be freely used, reused and redistributed by anyone
- Open Access and Open Data provide an open environment of academic research

Data Repository

- Publishing data to facilitate multidisciplinary research
- No more duplicate data entry!

4

CKAN introduction

- An open source project of Open Knowledge Foundation (OKFN)
- A powerful data manage system
- Python based develop environment

<http://demo.ckan.org/>

CKAN introduction

116 instances around the world (2015/3/7)

Over 30 plugins have been released

6

CKAN introduction

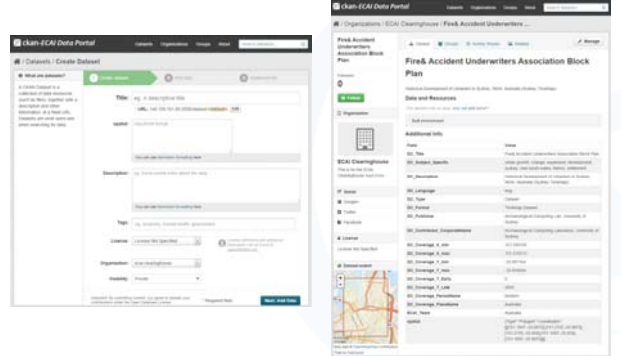

- Publish and Manage Dataset

7

CKAN introduction

- Publish and Manage Dataset

8

CKAN introduction

- Search Dataset

9

CKAN introduction

- View Dataset – basic image and text

10

CKAN introduction

- View Dataset – Spreadsheet

11

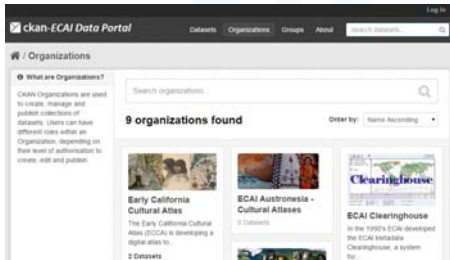

CKAN introduction

- View Dataset – PDF and Spatial data

12

CKAN introduction

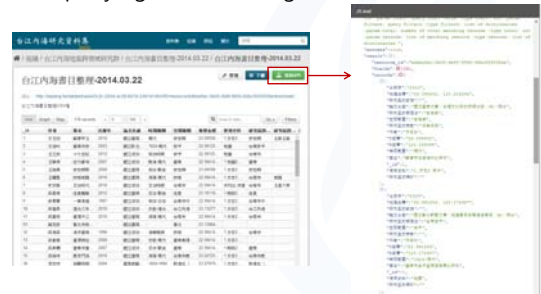

- Organization
 - Datasets can be public or private. If they are private they are only visible to the logged in members of their owning publishing Organization

13

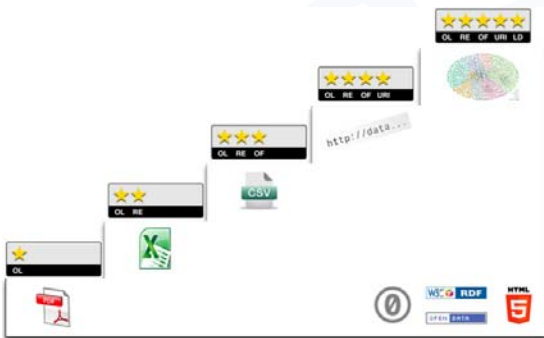

CKAN introduction

- CKAN API
 - CKAN provides a rich RESTful JSON API for querying and accessing dataset information

14

CKAN Support Linked Open Data (LOD)

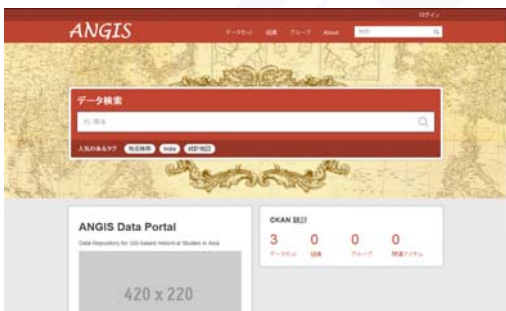

Tim Berners-Lee's five stars of openness

15

ANGIS Data Portal

CKAN-ANGIS Data Portal

- <http://angisdata.org> (<http://140.109.161.58:8989>)
- Data Repository for GIS-based Historical Studies in Asia

17

Test Accounts

<http://140.109.161.58:8989>

ID : angis1 (angis2~ angis30)

Password : angispwd1 (angispwd2 ~ angispwd30)

18

CKAN-ANGIS Data Portal

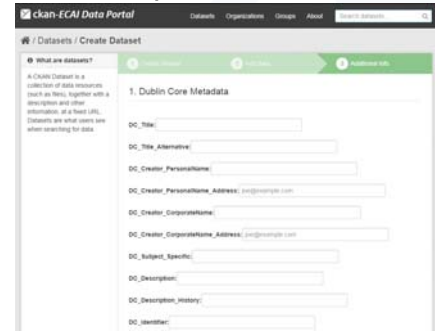

- Use the Organization to distinguish the dataset from different project

19

CKAN-ANGIS Data Portal

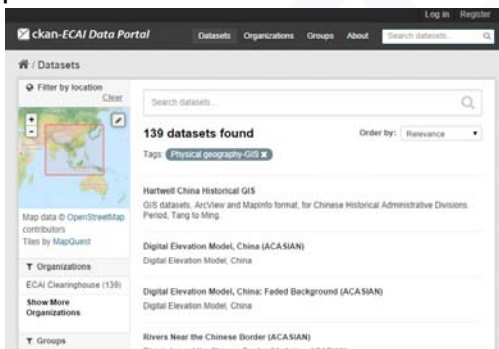

- Editing interface with **Dublin Core** metadata specification compatible

20

CKAN-ANGIS Data Portal

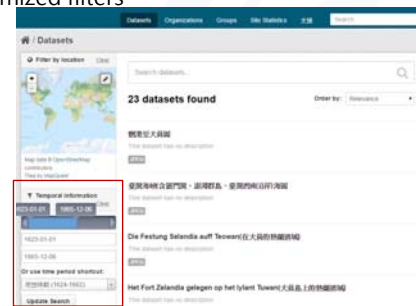

- Spatial search function

21

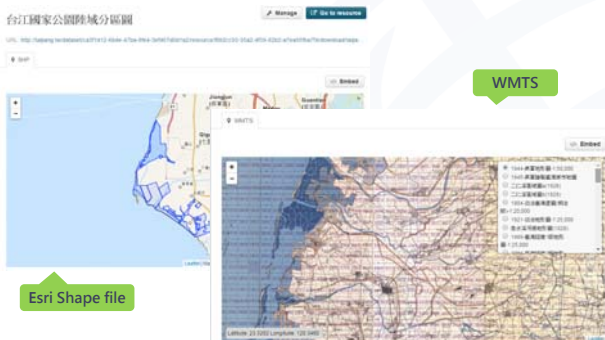

CKAN-ANGIS Data Portal

- More search capabilities are already extended
 - Temporal Search
 - Customized filters

CKAN-ANGIS Data Portal

- More spatial data format can be previewed

23

Future work for CKAN-ANGIS

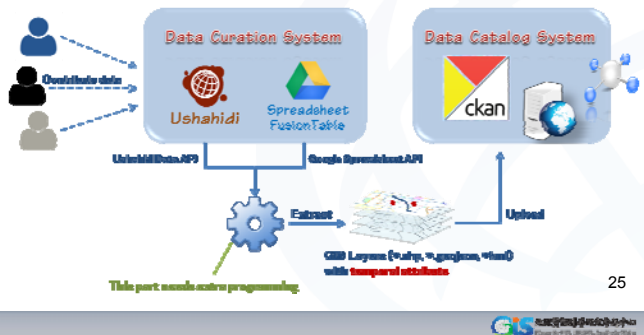

- Embedded CKAN with CSW service
- CSW: **C**atalogue **S**ervice for the **W**eb,
 - A standard for exposing a catalogue of geospatial records in XML on the Internet

24

Future work for CKAN-ANGIS

- Linking Data Curation System with Data Catalog System

25

Formats supported in CKAN-ANGIS

Data Type	Commercial Software	Free Software	Format
2D GI	ArcGIS 10.x	QGIS http://www.qgis.org	shapefile
3D GI	Skyline TerraExplorer	Google Earth Pro http://www.google.com/earth	kml, kmz
Time Information		HuTime http://www.hutime.jp	gtm
2D GI + t	Esri Story Maps http://storymaps.arcgis.com	TimeMapper http://timemapper.okfnlabs.org Excel2Earth http://excel2earth.blogspot.com	Google Spreadsheet Excel
3D GI + t		SinicaOView http://3dgis.rchss.sinica.edu.tw	

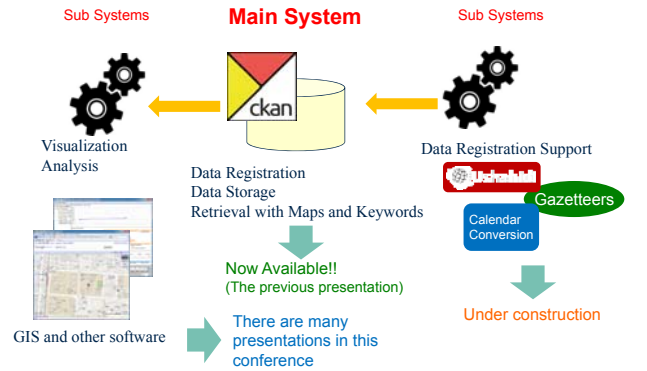

6

Workshop

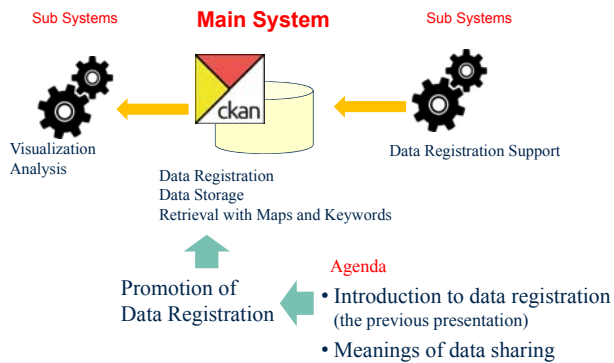

Research Institute for Humanity and Nature, Japan
Tatsuki Sekino

GIS Center, RCHSS, Academia Sinica, Taiwan
Hsiug-Ming Liao

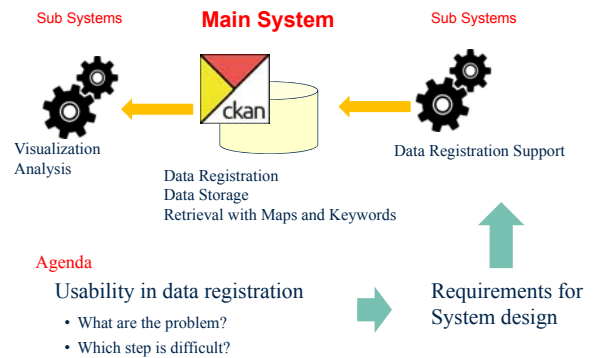

Strategy for Collecting Historical GIS Data

Objective of the Workshop : Promotion of Data Registration

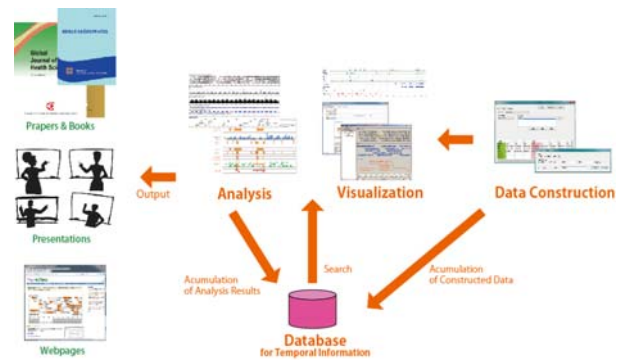

Objective of the Workshop : Collection of requirements for System Design

Meanings of Data Sharing from the Informatics Point of View

Role of Database (Repository) in a Research Process

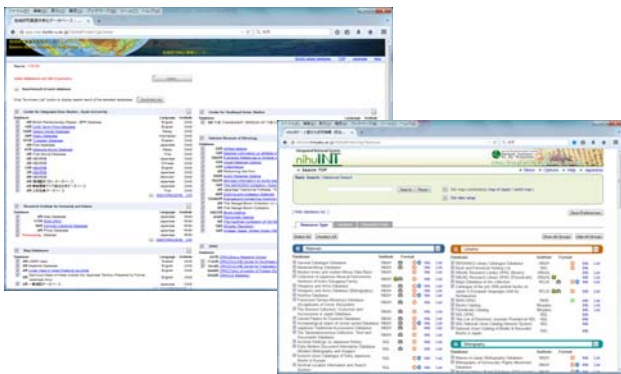

Network of Research Resources

Linked Open Data

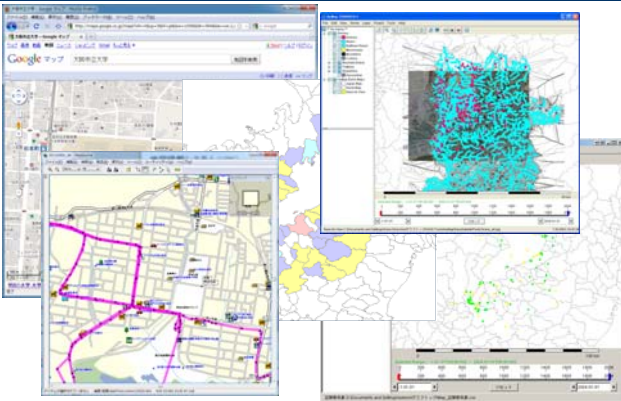

Database of Databases (Integrated Retrieval)

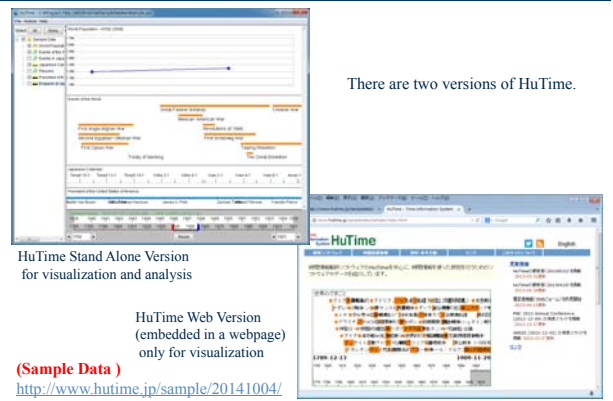

Three Axes to Link Different Kinds of Data

Geographic Axis vs Subject Axis - Geographic Information System (GIS)

Temporal Axis vs Subject Axis - Temporal Information System

HuTime Stand Alone Version for visualization and analysis

HuTime Web Version (embedded in a webpage) only for visualization

(Sample Data) <http://www.hutime.jp/sample/20141004/>

Agenda 1: Meaning of Data Sharing

- Linked Open Data, Database of Database (Integrated Retrieval)
- Visualization and Analysis using Geographic and Temporal Information System

These are merit of data sharing thought
by researchers in **information science**.

How do **historians** think the merit of data sharing?
What is incentives to register their own data into the repository?

- No one has such opinion ???
- I don't agree to open my data.
 - There is no merit for me.

Agenda 2: Usability in Data Registration

- What are the problem?
- Which step is difficult?

- Data construction (Table, data cleaning)
- Metadata construction
- Complicated process to data registration
- Conversion into values
e.g. Latitude and longitude of a place name
